Keeping Businesses **compliant**

Low cost health and safety training for all
your staff.

ATF

growth

AT&F Solutions Ltd was established back in 1998.

Our remit from day one was to provide cost effective training to all our clients.

Our core business back in the days was face to face training along with consultancy in Fire Safety and general Health and Safety.

It was down to demand that we looked into growing the business in the sectors that we now excel in.

Welcome

We trust the following wil give you an insight to who we are and what we offer, however, if you have any questions regarding our services please call us.

Where did it all start. AT&F Solutions Ltd 'Advanced Training & Fire Solutions' was formed back in 1998 offering a specialist service in fire safety consultancy and classroom based training.

In 1999 we expanded our training services adding a new in-house division offering a dedicated approach to 'e-learning' in order to capture a wider audience.

The inception of which created a successful training program enabling our clients to target ALL their workforce via a cost effective solution.

Cbt: 'In the line of fire' was our first successful program that gained both recognition and respect from several regional fire authorities, and from this led to the future development of a complete range of dedicated Health and Safety training courses, all developed in-house and by our own expert team of enthusiastic developers.

Developers in quality elearning
Training you can measure

Our approach

Because we develop our own systems it was simple for us to ask what our clients wanted first, and based on their feedback it became very clear 'keep it simple'.

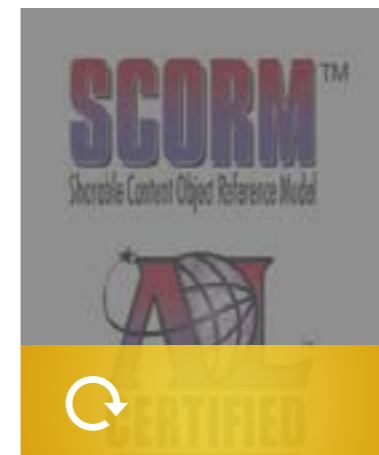

WebPortal which is our own 'LMS' Learning Management System has gone through many changes over the past decade, offering our clients a range of administration tools that they can work with and not struggle to understand. Our range of interactive courses are also easy to use and navigate, even for the 'newbies' out there.

Keeping things simple has given our clients confidence in using our products and services year in, and year out.

Support also comes very high on our agenda, and we pride ourselves on our fast turnaround. Whether you are a single user or a company user, everyone receives the same special service.

What we do

We have three main divisions: Scorm Content - Hosted LMS - Custom Studio

SCORM

Clients wishing to host our courseware on their own LMS's can do so. This is a service we have provided for many years.

There are two options to choose from, option 1 being 'perpetual' licence or option 2 'annual'.

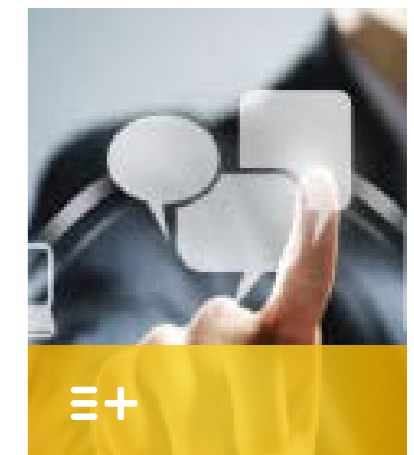

SCORM 2 GO offers access to our full library of courses and if a course is not available, we can tailor a bespoke module via our design studio, again with either licence option above.

Click HSE

ClickHSE is our own fully hosted LMS (formally known as webPortal). Having gone through many changes we now offer our clients the opportunity to have a 'zero' free solution for their general health and safety legislative requirements.

ClickHSE is fully hosted via our secure servers and allows a unique platform to deploy and track all your health and safety training from one place.

Custom

Our custom team are always on hand to help with custom edits, large or small.

Looking for a course that fits your own personal training requirements, then look no further.

We specialise in working closely with our clients to help them bring to life their own material. You provide the content, we add the magic...

Meet the senior Team

AT&F Solutions Ltd offer a wide range of expertise and a combined wealth of knowledge from key areas that makes a real difference to our services.

Who we are and what we offer our clients: Fire Safety and Consultancy has played a major role in our services to date. From fire safety we have excelled into other areas of key health and safety training along with risk management. Whether our clients are looking for online training or face to face we offer both. Our management team offer expertise in all areas such as Fire Safety, Fire Risk Management, Health & Safety Audits.

Unique Features

Easy communication with your staff via our new LMS

Zero IT requirements, we host and maintain for you

New modules under development

All your training records in one place

Secure server offering data protection.

A complete out of a box solutions

Making progress

'ATF WebPortal' our online LMS has for many years offered our clients a very cost effective way to deploy and track their health and safety training.

Click HSE is our latest development which will carry on the legacy of offering low cost health and safety training to our clients, however, along the way it will develop into more than just a platform for training modules. It will become a content management system offering a host of new admin tools for both the account holder, and trainee.

Our new mobile platform will host our latest health and safety training courses offering a wider range of platform choice from PC, Tablet and Mobile devices. Allied to this will be a new range of courses and risk assessments.

Despite a huge investment moving forward over the next few years, our approach to offering 'low cost' training will remain our key goal..

Accreditations

CDP Certification

All AT&F Solutions courses are CPD accredited and come with CPD learning credits. Each course offers one hour of continual professional development for all trainees. Each course completed clocks up one hour.

Not only do your staff gain new found knowledge in whichever course they chose to select they are also awarded a CPD certificate of credit.

Course Delivery

RoSPA Approval

Again like our CPD certification, all courses go via RoSPA for their own approval on content delivery. Allied to the CPD certification each course is also awarded with the RoSPA logo under content delivery.

This combined with CPD adds value to our training material, thus offering you and your staff a proven and recognised route to training.

New products

AT&F Solutions Ltd always strive to look at developing new products and services

ClickFRA is our latest online Fire Risk Assessment module that we are working on with one of our Fire Brigade Associates. This new online FRA module will allow businesses to complete their property fire risk assessment via a simple to follow process, thus enabling them to achieve compliance under the RRO Fire Safety Reform Order.

Businesses can now enjoy a step by step guide in order to complete their own FRA..

On successful completion of the risk assessment ClickFRA will provide a complete breakdown on the building along with any associated risks and actions plans required in order to fulfil and complete the questionnaire.

Over 500,000 Registered Users

ATF Webportal has been home to over 500,000 registered users, all enjoying the benefit of our online health and safety training portal.

Our clients have supported us for many years which is something we are extremely proud of as this proves to us that we are doing something right. We set ourselves a goal from day one, which was to offer a cost effective training solution that was sustainable for any size company. We are pleased to say this statement remains true today.

Somerston Hotels 'We have used the Web-Portal for ten years – the portal is easy to work with and continues to grow its capabilities ahead of our requirements – which says a great deal about the strong business relationship we have.' S.Williamson Group H&S

FedEx have used ATF Webportal for many years and the modules have been both cost effective and time saving by giving us a solid platform to deliver 1st class H&S Training to all of our staff at all of our locations in the UK & Ireland, ATF have always been ahead of the market ready to produce modules for current and new H&S areas as well as working with us to produce tailored training to our needs and industry" K. Christian Group H&S

Staffordshire Fire & Rescue What we appreciate most about working with Terry and his team at ATF Solutions is their ability to cut through the predictable politics and bureaucracy of a project, keep everyone happy, and deliver the expected results and then some" J. Berrisford Business Support Lead - Staffs Fire
