**Developers in quality elearning
Training you can measure**

Welcome

Very few people have experienced a fire situation and the feeling of panic that it may cause.

Good quality fire safety training can overcome this problem to some extent. Here at AT&F Solutions Ltd we take great pride in how we deliver our fire training courses. Each course is tailored to the client's environment making sure that any risks identified are covered during the training programme. All course attendees are actively encouraged to take part in our practical session which is conducted on-site in a safe and controlled manner using our live fire training simulator.

The Regulatory Reform (Fire Safety) Order 2005 places the onus for fire safety upon the Responsible Person. The responsible person must ensure that the employees are provided with adequate safety training (Article 21). There is a further requirement for the responsible person to appoint one or more competent persons to assist in this function (Article 18) and to assist in the event of a premises evacuation (Article 15).

Fire Training

AT&F Solutions Ltd offer onsite clasroom based fire safety training courses, and also brigade approved eLearning via our fully hosted learning management system ClickHSE.

There are two main roles that the competent person will undertake. As the terms Fire Marshal and Fire Warden are the most commonly used titles, these will be used to differentiate between each role.

What we do

Fire Marshal - Fire Warden - Basic and Fire Extinguisher Training courses

Fire marshal should take overall responsibility for the co-ordination of information and to the decisions necessary to ensure the safety of people and property during and emergency or evacuation of the premises.

The fire marshal should surrender responsibility to the senior officer from the emergency services but remain readily available to provide information as and when requested. A fire marshal is most likely to be the responsible person or a direct deputy, as that person is most likely to have the necessary competence, knowledge, experience, training and authority.

Fire warden should be an appointed competent person who should take responsibility for local fire safety, the knowledge and awareness of the people in the area and ensure that the area is completely clear in the event of an emergency evacuation.

It is important that the fire marshal is competent in both roles however the fire marshal would not be expected to undertake the duties of a fire warden in an evacuation as this would compromise the ability to carry out the controlling function effectively.

Fire Awareness and Fire Extinguisher training course are also available giving you and your staff a great insight into both theory and practical use of extinguishers.

Both courses offer exceptional value. If however, you are looking for a course that fits your own personal training requirements, then look no further .

We specilise in working closely with our clients to help them tackle specific inhouse training requirements.

Fire Marshal

This course is designed for employees nominated as fire marshals within in their workplace. The training programme covers both emergency and non-emergency issues and provides attendees with an appropriate level of understanding to allow them to carry out this vital role.

Who should attend?

Nominated competent persons who have a responsibility for implementing the workplace fire evacuation procedure. It is also suitable for persons who have a direct responsibility for developing or improving existing evacuation procedures and maintenance of the premises general fire precautions.

The areas that will be covered in this course are:
- Introduction to The Regulatory Reform (Fire Safety) Order 2005
- Overview of the Fire Risk Assessment process
- Theory of Fire
- Fire Transmission
- Common causes of fire
- Fire classification
- Fire extinguishers and how to use them
- Basic fire prevention
- Actions to take upon discovering a fire
- Actions to take upon hearing a fire alarm
- Evacuation process including provision for those needing assistance
- Live fire demonstration, including delegate participation

Course objectives
By the end of the course the delegates will have an enhanced understanding of the legal requirements of managing fire safety in the workplace. They will be able to recognise potential fire hazards and the appropriate actions required to rectify them. Demonstrate their ability to identify individual classes of fire and select an appropriate extinguisher to tackle the fire, if it's safe to do so. The delegates will also have a better understanding of the various methods of evacuation and be able to determine the best method for their workplace.

Duration
One day – 0930 to 1630 hours approx.

Assessment
A certificate of attendance will be issued to delegates attending the course.
All attendees are issued with detailed course notes.

Fire Warden

Fire Warden
Course overview

The Fire Warden course is designed for those members of staff who have been given a responsibility for assisting the responsible person by maintenance of the general fire precautions and assisting with the evacuation of their immediate working environment in an emergency. The training programme covers both emergency and non-emergency issues and provides attendees with an appropriate level of understanding to allow them to carry out this role.

Who should attend?
